

Printing Year 2

Making a print involves transferring an image from one surface to another (usually paper). This can be repeated creating identical images over and over again.

Vocabulary

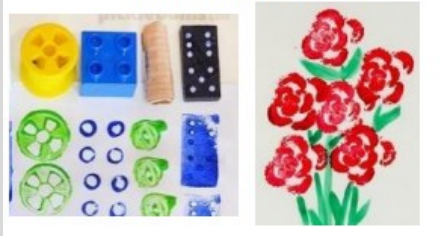

Designer: a person who draws and plans how to create something.

Print: an image made by any method involving transfer from one surface to another.

Pattern: a repeated design.

First we will explore **block printing** by applying paint to different objects and pressing them onto paper to create repeated patterns.

Printing using natural and man-made tools

Next we will draw a pattern and print using polystyrene.

1. Draw your design onto a piece of polystyrene.
2. Put the roller in the paint and roll over the piece of polystyrene (covering it all with paint).
3. Press the polystyrene onto a piece of paper.
4. Repeat steps 2-3 if you want to print again.

Inspired by the Irish designer **Orla Kiely**, who is famous for her fabric and pattern designs.

Orla uses nature to inspire her designs. Such as birds, elephants, pears, flowers and leaves.
