

# We are all stars!

How are they formed?

Sedimentary rocks are formed by a sediment that is deposited over time, usually as layers at the bottom of lakes or oceans.

Where you find them?

Much of southern England is made up of sedimentary rocks.

**Congratulations! You are all**

**STARS OF THE WEEK!**

**Take a look at some of  
wonderful activities you have  
been doing this week and let's  
celebrate your successes.**

**Well Done to everyone!**
